

LUBECO™ ECO-COVER

PREMIUM QUALITY
BIODEGRADABLE
SPRAY ADJUVANT

LUBECO™ ECO-COVER

is a highly reliable spray adjuvant based on a blend of Cold-pressed Rapeseed Oil and modern Non-ionic Surfactants. It is suitable for use to improve effectiveness of a wide range of agrichemicals, including herbicides, insecticides, fungicides, defoliant and desiccants, particularly where oil-based adjuvants are recommended or specified on the label of the agricultural chemical.

ACTIVE INGREDIENTS:

90% esterified rapeseed oil
with 10% modern non-ionic surfactants

ADVANTAGES

- Excellent wetting, spreading and adhesion effect
- Effective and efficient use of agrichemicals
- Reducing spray drift and evaporation of active substances
- Environmentally friendly, causes no harm to the environment

DIRECTIONS FOR USE

This product may be used wherever oil-based adjuvants are recommended or specified on the label of the agricultural chemical. The recommended use rate of ECO-COVER for all such applications is 200-500ml/100 litres of water or 0.2-0.5% of the spray volume.

PACK SIZE:

5L, 20L, 205L, 1000L

User comments:

"Significantly improves efficiency of herbicide application."

"Superb reduction of spray drift."

"Very safe to use and much better for the environment than using mineral oil."

"Reliable and cost-effective."
